OBSERVATIONS

Cardio remarks	Severe dilation and rounding of the left ventricle with very poor systolic function. Moderate mitral regurgitation present, secondary to mitral annulus stretch and mildly degenerative mitral valve. Severely enlarged left atrium. Right side of heart normal. No arrhythmia on ECG.
Conclusions	Multiple criteria of advanced dilated cardiomyopathy. Treatment: Furosemide as needed based on resting respiratory rate <25 bpm Pimobendan min 0.25mg/kg bid, can increase to tid

Benazepril 0.5mg/kg sid
SpIronolactone 2mg/kg sid
Taurine 500mg bid
Omega 3 supplement
Avoid excess salt in diet
Controlled exercise
Please feel free to contact me if refractory to this treatment.
Prognosis guarded.
Gemma O'Donoghue PGC ESPVS CERT CARDIOLOGY.
